

10. The electronic device chassis of claim 1, wherein said two or more devices are storage devices.

11. The electronic device chassis of claim 1, further comprising:  
a locking structure for locking said bracket in a first position.

12. An electronic system comprising:  
a chassis;  
a bracket for mounting two or more devices, said mounted devices oriented in a first plane;  
a hinge for rotatably connecting said bracket to said chassis, said hinge oriented parallel to said first plane.

13. The electronic system of claim 12, wherein said two or more devices are storage devices.
